

HOW TO REMOVE AND REAPPLY THE DOUBLE-SIDED TAPE

After about 2-3 months (this clearly depends on the hair regrowth) the double-sided tape extensions have to be removed and accurately replaced if wish to continue wear. In this period your hair will grow back, therefore is appropriate to replace the extensions in their optimal position.

BEFORE STARTING:

It's important to create a kind of outline to remember in which position each strand was before the removal. We use a non-stick paper on which we draw the head outline. We'll temporarily put the lengths on the paper in the same position in which they originally were. In this way we'll know exactly where replace the locks, keeping the previous result (thanks also to an excellent and designed haircut).

HOW TO REMOVE DOUBLE-SIDED TAPE EXTENSIONS:

Removal is quite easy! We recommend to use our brand Golden Lush Extensions Tape Hair Remover Solution for fast and best result!

To remove the Tape Extensions adhesive, use a few drops of remover between the two strands applied. If you are having trouble dissolving the tapes, please use a hair straightener just exactly how you first apply. Apply heat on for 2-4 seconds to soften the tapes for fast dissolvent.

Do not pull! Remove gently with the help of some remover drops and it should peel off like a stickers. Brush out the residue after removal. You have to rub it with your fingers and remove the glue residue.

Now is possible to wash the hair with shampoo and conditioners. Blow dry them and put on the replacement hair. Dry well with a hair dryer and then apply on clean strand a new double-sided tape.

The Extension Tape replacement adhesives pre-cut are of the same size of the Tape Extensions.

Please contact our custom services for assistance via Live Chat, email or by phone during your removal if you have any questions.

All Tape removers, pre-cut tapes and tools are sold separately.
