GOLDEN LUSH EXTENSIONS
BEST QUALITY HAIR

IT IS ESSENTIAL YOU OBSERVE THE FOLLOWING INSTRUCTIONS BEFORE YOU PROCEED WITH THE TAPE HAIR INSTALLMENT.

How to install tape-in hair extensions.

ITEMS NEEDED:

Tail comb
Crocodile clips
Tape hair
Hair straightener
Steps:

1. Section the natural hair where your first extension will be placed.
2. Using your tail comb, pick up a thin slice of natural hair as wide as your tape extensions (you will apply extensions to both sides of this natural hair slice).
3. Peel away the tape backing of your first extension.
4. Hold the natural hair and position the tape hair underneath it.
5. Press the natural hair downward into the tape leaving a space between the scalp and the extension.
6. Peel away the backing of your second hair extension.
7. Place this piece directly over the first, sandwiching the natural hair in between.
8. Press the extension pieces together.
9. Use the hair straightener to apply heat to the tape for 4-6 seconds. Repeat for another two seconds. **(Please note if tape falls out after the first wash, this indicate that your installment was not done properly/sealed properly!)**
10. Use your fingertips to press the tapes together.
11. Continue this process until you have completed your desired installation.
12. Do not wash your hair for 48 hours after application to settle the tapes.

    ***Note: Tape hair require heat.**

BEST MAINTENACE TO AVOID SLIPPING/PEELING:

DO NOT APPLY CONDITIONER/OIL BASE DIRECTLY TO THE TAPES.
